Overview

I possess years of experience developing web
applications, PWA's, and hybrid, cross-platform mobile applications using a wide array of technologies. I take pride in my wealth of skill and knowledge. I specialize in JavaScript and TypeScript, yet I am talented with a multitude of languages, frameworks, libraries, and other tools.

Work History

Oct. 2023 - July 2024

Bader-Rutter and Associates
Frontend Developer
Milwaukee, WI (Remote)

Mid-Level Role: I worked on a variety of projects for various clients at this agency, including Zoetis, McCain Foods, Douglas Products, and Corteva. I contributed to a project that is claimed to be the best piece produced in over a decade in agency history. I primarily work with Vue and JavaScript, but I also work with Azure, WordPress, and Firebase (Inc. Firestore and Firebase Functions). My most recent successful project was a Progressive Web Application (PWA) I was heavily involved with.

Jan. 2023 - May 2023

The Eighth Notch / The Rockridge Group
Web Developer
Nashville, TN (Remote)

As a contractor, I was responsible for various projects, including a client portal, a data dashboard, and The Eighth Notch's company website itself. Although I primarily worked on the frontend aspects of these projects, I was also involved with backend development. I had exposure to Google Cloud Platform (GCP) and interacted with BigQuery and MySQL database management systems. Common technologies used were Typescript, JavaScript, and Python/Flask. I also kept my Jira tickets updated and tidy, committed my changes frequently, pushed to Github often, and deployed my projects to the test environment using Jenkins.

Jul. 2022 - Oct 2022	**Freightwaves** Frontend Developer Chattangooga, TN (Remote) I worked on various SaaS platforms pertaining to the freight industry. Technologies used were Vue3, Vuex, Pinia, JavaScript, SCSS, and charting libraries.
Feb. 2022 - May 2022	**Tombras Group** Frontend Developer Knoxville, TN (Remote) I collaborated with the "DevSouth" .NET team and worked on websites for a Fortune 500 company, specifically Daimler. I was tasked with updating and modifying websites for Freightliner and Western Star. I worked with Umbraco, CSS, Tailwind CSS, JavaScript, and of course, Git and Bitbucket.
Mar. 2021 - Jan 2022	**Solution Consulting Group** Web Application Developer Knoxville, TN (Remote) I was solely responsible for developing the user interface for a collectable card grading software. With this solution, graders can drag lines to calculate centering scores and provide grades for corners, edges, and surfaces for both the front and back of the card. In addition, I completed small tasks, for example, developing email templates. Common technologies included HTML, CSS, JavaScript, TypeScript, Git, GitHub, Bootstrap, and some jQuery and Symfony (PHP). Object-Oriented programming practices were often used.

Jun. 2020 - Jan 2021	**Bluestone Apps**
	Junior Developer
	Knoxville, TN

As my first developer role, I was tasked with coordinating development projects with overseas developers in addition to working on hybrid, cross-platform mobile applications using Angular in conjunction with Ionic Framework and Cordova. Two major projects I worked on were Check Runner and Home Birds. You can find the Check Runner app in the Google Play Store and iOS App Store.

Education

Graduated 2013	**Hardin Valley Academy**
	High School Diploma
	Knoxville, TN
